

List of equipments summer for 3-7-days mountain tours (Ratekjokk and Biellugis trail)

All personal equipments you pack on your own horse in saddlebags during the tour. It can be windy and cold up in the mountains, so take warm clothes with you. We will help you with your packing before we leave. It's not very much room in the saddlebags so we have to think about what we really need to take with us. You just need to pack for two days in the saddlebags, some things you can send to the cabin in Ratekjokk (if the tour is going there), then you can have some extra clothes to change to. We have sleeping bags and reindeer skins/sleeping mattresses in the tepee, so you just need to take a travel sheet to put into the sleeping bag and in the bed in Ratekjokk. Long-sleeved underwear, long underpants and socks are good to sleep in in the tepee, wool is the warmest material. If you don't have wool or silk, then syntetic is better than cotton. The cell phone isn't working everywhere during the tour. You can load your electric equipments on the farm in Puoltsa or in the cabin in Ratekjokk. Other luggage we can keep for you during the tour on the farm.

Equipments:

Raincoat/long raincoat and rain trousers (you can borrow from us)
